OUR SERVICE ADVANTAGE

Providing the highest quality
of multi-specialty care for our
patients

The Diabetes Centre®

MEDICAL ASSISTANCE

Our physicians care deeply about their patients long-term health. Without question, our Physicians are determined to provide the care and services necessary to ensure that each patient is treated appropriately, irrespective of their ability to pay.

THE DIABETES CENTRE'S HISTORY

Dr. Asjad Hameed wanted to bring quality diabetes care, normally only found in developed countries, to patients in Pakistan. He brought the latest in medical technologies and treatments to The Diabetes Centre.

we offer unparalleled treatment options ranging from preventative services to advanced therapies

01

Changes in diet and physical activity are at the heart of any treatment plan for a diabetes patient.

02

Regular physical activity, while maintaining your appropriate weight, is essential for reducing your risk of diabetes and its complications..

03

Some people say they experience excessive thirst, urination, and weight loss. These are some of the common symptoms of diabetes..
